

30405 Energy Slip On

Smart slip-on work shoes in microfibre and textile - ideal for healthcare professionals in hospitals and the medical industry. The smooth upper, a combination of microfibre and a neoprene-like textile, makes the shoe soft, repels liquids and is easy to clean. With no visible seams, the upper can even withstand wiping with ethanol. The heel cap, made of a neoprene-like textile, can easily withstand being stepped on, making it easy to put on and take off the shoes, and giving the same shoe two functions. The outsole consists of the innovative technology SIKA HexaGrip. The sole is made of durable rubber, and the sole pattern consists of multiple hexagons, contributing to 360° slip resistance and easily redirect liquids away from the sole, providing better grip on indoor surfaces. The soft EVA foam midsoles make the shoes flexible, lightweight and uniquely shock-absorbing. Air bubbles in both the midsoles and outsoles, SIKA BubbleTech, ensure excellent shock absorption, making each step feel lighter and your workday more comfortable. The work shoes are metal-free, PVC-free and ESD-approved.

CE Norm EN ISO 20347:2022

Serie Energy

Spezial features Slip On work shoes, Easy-to-clean microfiber; SIKA HexaGrip 360° slip resistance; SIKA BubbleTech; ESD-approved

Outsole The combination of a rubber outsole and an EVA foam midsole provides a durable, lightweight, flexible and uniquely shock-absorbing shoe. Air bubbles in both the midsoles and outsoles, SIKA BubbleTech, make each step feel lighter and make your workday more comfortable.

Upper Smooth upper in a combination of water-repelling microfibre and a soft, neoprene-like textile that makes the shoes soft and easy to keep clean.

Lining Breathable and sweat-absorbing mesh lining with extra microfibre reinforcement in the heel.

Inlay sole/ Insole Sweat-absorbing PU foam inlay sole with antistatic qualities.
