

60401 Cloud Slip-on

Lightweight safety shoe with Slip-on feature, certified according to the new standards from 2022. Ideal for personnel working in the pharmaceutical and food industries, where there are strict hygiene requirements. The upper is made from water resistant microfiber, which, combined with a smooth design, makes the shoe easy to wipe clean. Can withstand being wiped clean with ethanol. The slip-on design of the shoe makes the shoe quick and easy to put on and take off. The lightweight aluminium toe cap protects the toes against heavy falling objects. The outsole, which is made from rubber, ensures a good grip on the surface and is highly slip resistant. The midsole is made from soft, shock absorbing EVA foam (SIKA Aerosol™ Foam), which makes for a lightweight, comfortable and flexible shoe. The breathable inlay sole is shock absorbing and includes upcycled PU foam, which is made from foam residues from the production of the inlay sole. ESD approved.

CE Norm EN ISO 20345:2022

Serie	Cloud
Speciel features	Lightweight safety shoe with aluminum toe cap, SIKA Aerosol™ Foam; Smooth design; Easy-to-clean microfiber; Outsole with special slip-resistant properties; ESD approved
